Objective

Computer and AI Engineering student (GPA 3.72/4.0 dual degree with University of East London) with solid foundations in software, systems, and databases, and hands-on experience in ML and Agile delivery. Committed to building reliable digital tools for sustainable development.

Education

Bachelor of Engineering in Computer and Artificial Intelligence **2024 – 2028**
Ain Shams University (dual degree with University of East London) | GPA: 3.72/4.0
Coursework: OS, Compilers, Database Systems, DSA, Software Engineering, Computer Organization, Intro to AI

General Secondary Education Certificate, Science (Mathematics) **2016 – 2024**
Qaitbay Private Language School | Grade: 95% - Ranked 1st in class, top 2 ranking across final 3 years

Skills

Languages | C, C++, Python, Java, C#, SQL, MIPS Assembly, VHDL, JavaScript, HTML
Frameworks & Libraries | PyTorch, TensorFlow, Pandas, NumPy
Dev Tools & Practices | SQL Server, Git/GitHub, VS Code, Qt 6, Eclipse, SDLC, UML, OOP, ML, Cloud Computing, Jira
Hardware & EDA Tools | AVR/ATmega328P, Arduino, FPGA, Xilinx ISE, LTspice, Logisim, Proteus, MATLAB, Embedded Linux, Linux Administration
Networking | CCNA (Routing & Switching), TCP/IP, Network Security, Cisco Packet Tracer

Experience

DEPI | Data Science Trainee (IBM) **Jul 2026 - Present**
- Learning Python, SQL, data analysis/visualization, ML, and MLOps (MLflow, Hugging Face)

NTI | Network Infrastructure Trainee **Aug 2026**
- Completed a CCNA-aligned program covering routing/switching, IPv4/IPv6 addressing, network security, and troubleshooting

Edges Academy | Embedded Linux Trainee **Jul - Aug 2026**
- Completed training covering Linux booting, cross-compilation, kernel/filesystem builds, and Linux administration

iCareer | Digitera Tech Trainee **Jul 2026**
- Completed a hands-on technical track covering AI-assisted development (Cursor, Claude Code, MCP), Git/GitHub collaboration, and Agile delivery (Jira, sprint planning, BRD→PRD)
- Built a capstone end-to-end product delivery project, including technical documentation and testing

Luban Workshop, Ain Shams University | Robotics Trainee **Feb 2026**
- Programmed an autonomous maze-solving robot (MicroMouse JQ platform, ATmega328P) with real-time navigation, multi-sensor integration, and motor control

Edges For Training | Embedded Systems Level 1 Trainee **Jul 2025**
- Programmed ATmega microcontrollers in C at register level, building an FSM-based digital I/O counter system and a PWM motor control system

Certifications, Languages & Awards

Certifications: Huawei Cloud Certified Developer – Tech Essentials Associate (ITIDA x Huawei Cloud) | IELTS 7.0 (C1) – British Council | Google Build With AI – Google Developer Groups & ITI | Power Query in Excel – Simplilearn
Languages: Arabic (Native) | English (Fluent) | French (Proficient)
Awards: 2nd Place, ASU MicroMouse Competition (2026) | 1st Place, Most Influential Presentation, ASU (2024)

Projects

Scene Style Classification | Python, PyTorch, Deep Learning **May 2026**
- Co-built an ensemble image classifier combining EfficientNet-V2-M and ConvNeXT architectures
- Owned the fine-tuning and optimization of the EfficientNet-V2-M pipeline

FOS Kernel Development | C, OS Design **May 2026**
- Collaborated with a 6-member team to develop core subsystems for FOS, a custom x86 operating system modelled after the JOS architecture
- Designed a Next-Fit kernel heap allocator, an Nth-Chance Clock demand-paging fault handler, and a pre-emptive MLFQ CPU scheduler

TinyLanguage Scanner & Parser | C#, Compiler Design **May 2026**
- Co-built a two-phase compiler for the Tiny language: a lexical scanner producing classified token streams and a recursive descent parser generating a structured parse tree, wrapped in a C# GUI

Cinema Ticket Booking System | SQL Server, T-SQL, C#, SSMS **May 2026**
- Collaborated with a 7-member team to design a normalized relational schema and build a C# GUI for end-to-end booking management, seat allocation, customer records, and multi-query reporting
